B4U (Be For You Fan Token) is designed as community token with a **strong long term vision and strategy**. History is product of community and the same holds true for cryptocurrency. Thus ❤️ unknown developers initiate a competition in cryptosphere by introducing a new ecosystem which provides entire benefit to the holders. ❤️ are determined to deliver profit to all the smart people who believe in this system. **Instead of high volatility, ❤️ ensure a continuous development/growth which will benefit all the members who join us irrespective of time.**

As per ❤️ experience, for the stable growth of ecosystem, it is wise to disclose ❤️ plans & associations at an appropriate time. ❤️ will share plans step by step & implement as ❤️ get approval from the community.

## Winning strategy

- Buy & hold token - An amount, which is affordable for long term, by keeping in mind about burning process (99.9% burning and more). **Sell tax is negligible after initial burning process.**
- Best benefit in bear market through huge reward, which will result in an evergreen growth.
- Be active in community & monitor investment.
- **Holders benefit** - 1.Holding rewards (upto 99% token burn) , 2.Free NFT, 3.aClassified, 4.Voting power, 5.bCla., 6.Staking rewards (after 99% burn), 7.cCla., 8.xCla., 9.yCla., 10.zCla and more.

## Warning

- **Don't buy in huge quantity for short term holding.**
- Don't expect huge pump. Don't buy/sell Token without reading whitepaper.
- There is no shortcut in life, invest your hard earned money with caution & understanding.
- Read tokenomics, future stages & contract. **Go through ❤️ plans at different stages.**

## Taxes

Taxes on transactions are implemented for benefiting holders, mainly as rewards & burning.

Development wallet is controlled by community voting system.

Tax	Total	Reward, 80%	Burn, 12%	Development, 8%
Buy	10	8	1	1
Sell	40	32	5	3
Buy/Sell after 99% burn	1	0	0	1

#### Add-on

1. Reward Distribution is automated, distribution interval may vary depends on trading volume & fee.
2. The burning & development tokens are collected in a single wallet. Burning (transfer to dead wallet) is completely manual. The usage of development wallet is based on community voting only.
3. Tax after the 99% burn of the total supply
  - 1% buying/selling tax
  - No holders rewards. Staking rewards will start after 99% burn.
  - Start conversion to stable coin
4. Extra holding rewards : The token holders are eligible for receiving free APL coins (amount depends on holding period and amount of AFT tokens). APL coin will be based on a new efficient block-chain and will play a significant role in future business entity.
5. Holder with more than 1E14 tokens should sell or transfer tokens ones in four months to keep it active. Inactive tokens are not included in the reward pool and those wallet will be black listed. The removal of black listing can be done by a burning a percentage of holding tokens.
6. Once a selling transaction is executed from a wallet, that holdings of that wallet wont be able to get holding rewards. It should be transfer purple to other wallet to get rewards.
